

## FEATURES

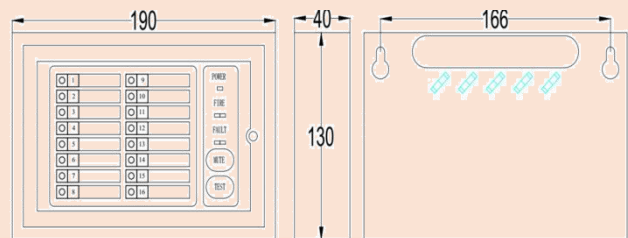

- **A remote unit of Zone Indication of Conventional Panel**
- **Maximum 16 zones**
- **Separate Indications of Fire and Fault**
- **Two buttons of MUTE and TEST**

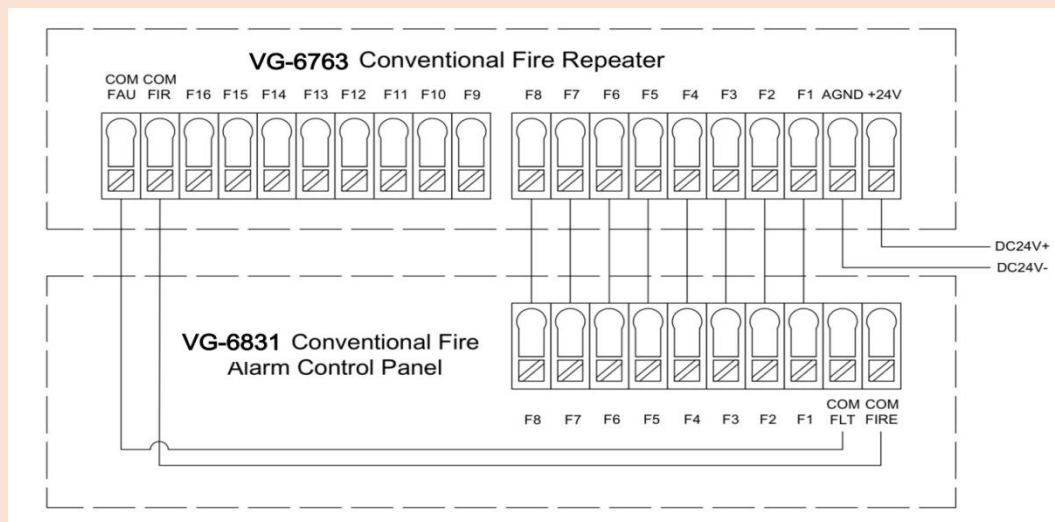

## DESCRIPTION

VG-6763 is developed as an remote unit with LED to indicate the status of detection zones. It can be connected directly with the outputs of Fire and Fault from the conventional panel. Normally installed in a different location, VG-6763 has the same indication as the Zone Indication at the front of the conventional panel VG-6831.
