

FEATURES

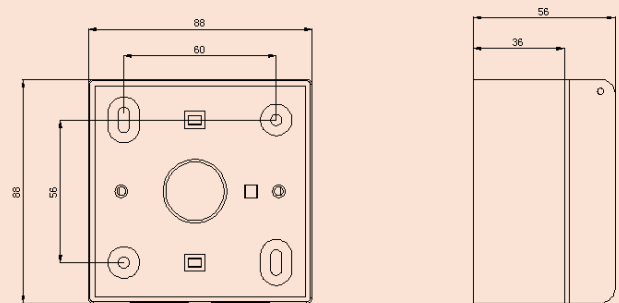

- * **Electronic addressing**
- * **Resettable via special key**
- * **Flush or surface mount installation**
- * **Simple connection with removable terminal block**
- * **Stylish appearance and low power consumption**

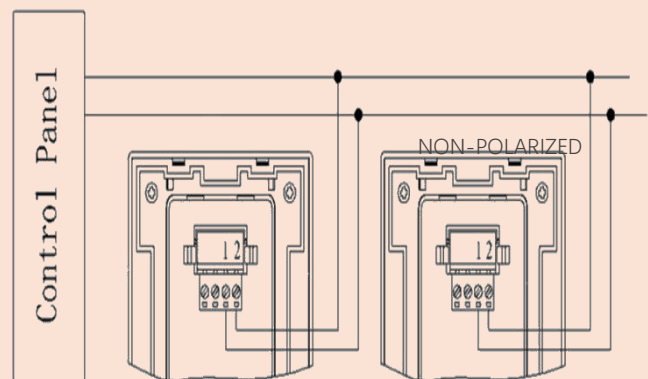

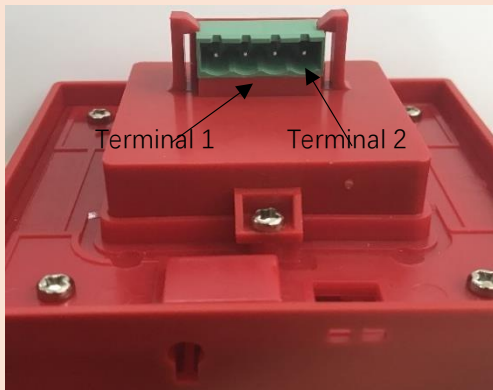

DESCRIPTION

VG-6652 Intelligent Manual Call Point is an essential device to manually initiate a fire alarm. This call point is designed with non-glass breaking activation which increase its repeatability and it can be reset via a special key. The call point can be addressed via a programmer so as to communicate with the V-GREAT intelligent panel. The multi-installation ways allows it can be installed anywhere along hallway or Exit for easy access.

DIMENSION

WIRING INSTRUCTION

TECHNICAL DATA

Operating Voltage	DC15-28V	Transmit Distance	Max. 2000m
Standby Current	≤0.4mA	Temperature	-10°C ~ +50°C
Action Current	≤0.9mA	Humidity	≤95%RH, non-condensing
Contact capacity	30VDC/100mA	Dimensions	88*90*32mm
