

FEATURES

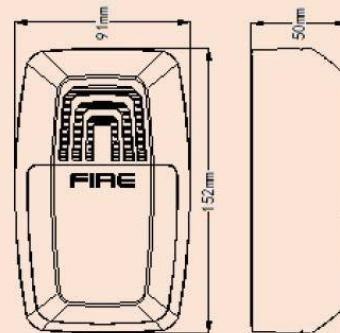

- * **Electronic Addressing**
- * **Audial and visual warning**
- * **DC24V power supply required**
- * **Fast responding time and low power consumption**
- * **Plug-in structure design for easy installation**

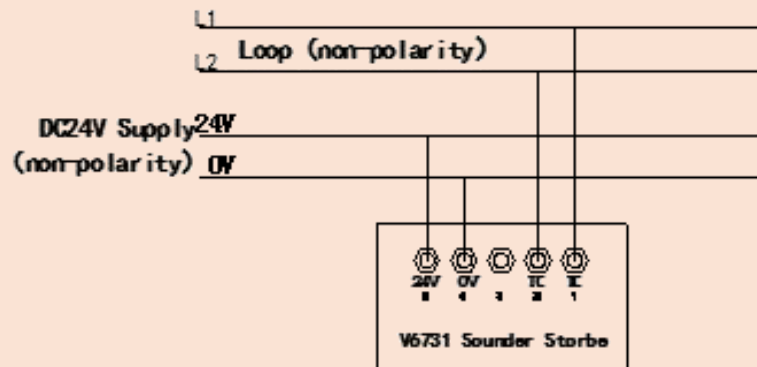

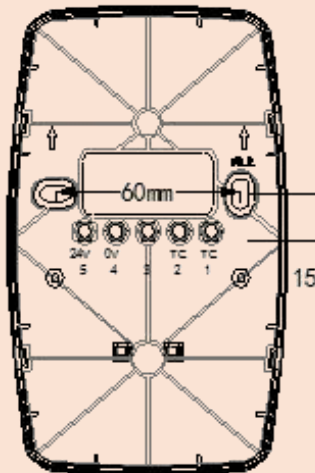

DESCRIPTION

VG-6731 Intelligent Sounder Beacon is an alarm warning device with combination of flashlight and sound. The sounder can be activated by either manually control on panel or "cause & effect" program automatically, and restored when a fire situation is removed. It is used as an important device to alert people for evacuation during fire condition.

WIRING INSTRUCTION

TECHNICAL DATA

Power Voltage	DC15-28V	Sound	80 ~ 95dB
Standby Current	≤ 0.5mA	Transmit Distance	Max. 2000m
Action Current	≤ 50mA	Temperature	-10°C ~ +50°C
Cycle	2* (1±20%)	Humidity	≤ 95%RH (40±2°C) non-condensing
Flash	1Hz ~ 2Hz	Base	VG-6615
